

Soil Conservation Men Start '51 Prog.

The Will County Soil Conservation district directors held their January board meeting last Wednesday at the Farm Bureau bldg. in Joliet.

A 1951 budget for district operating expense was tentatively prepared and is to be completed at the February meeting.

Directors' activities were worked out for the coming year. The general feeling was that cooperation with other county agricultural agencies was needed.

Wilbur Francis, vice chairman of the directors, presided in the absence of Lloyd Bate.

Since three-fourths of Will County is now completely soil surveyed and the original field sheets are on file at the Soil Conservation Service office, the Will County Farm Bureau is studying a procedure for supplying conservation survey maps to individual farmers.

Farm Bureau directors present were: Walter Noble, Wm. McGrath and Clair Hemphill.

Art Kelley and Charles Fletcher, Soil Conservation Service technicians, reported holding progress meetings with nine neighborhood groups during January, and are now scheduling progress meetings with other fine groups. Planning meetings with the West Monee and Rolling Acres groups of Will township are to be held next week.

Minott Silliman, Jr., District Conservationist, reported on soil conservation activities in surrounding county districts.

Will soil conservation directors present were: Wilbur Francis, Manhattan, vice chairman; Harlow Nicholson, Elwood, secretary; Harold Kemmerer, Plainfield; William Schramm, Manhattan and Kenneth Maves, Peotone.

A progress meeting was held by the Upper Morraine neighborhood group on the afternoon of February 8 at the home of Mr. Royce Bundy in Manhattan township.

Mr. Fletcher showed a movie entitled "Raindrops and Erosion," and led the group in a discussion of the requirements of certain crops for rain, methods of obtaining better air and water movement through the soil, and ways of increasing the water holding capacity of the soil. The group entered into the discussion and many interesting experiences were told and ideas exchanged.

Future plans for the group were discussed. The possibility of an interview of the group in regard to its history, activities, and accomplishments by Everett Mitchell was mentioned. Interest was shown in holding a pasture field meeting to plan locations for seeding some of the recommended pasture mixtures.

At St. Petersburg a pleasant visit was had with Mr. and Mrs. George Cooper. They spent a night at Gould and one at Homestead in a motor court and while there thought of the Gundersons at Homestead but did not know how to contact them.

On the return trip they ran into 75 miles of hard traveling on heavy snowy roads in Tennessee.

Appoint Local Firm As Coating Agency

Welsh Lumber Co., has been appointed a retail outlet in Mokena for a new type, long-wearing, moisture-repellent 'Concrete for Concrete' coating developed especially for painting concrete basement floors, walls, home laundries, outdoor terraces, "rumpus rooms", brick and porous masonry surfaces. It was announced by Edward M. Loeser, president of Lowebco, Inc., of Chicago, manufacturers of the product.

Born of wartime research in the synthetic field, the free-spreading coating forms a durable, protective, glossy finish that does not check, peel, chip or "dust" off. It dries in three to four hours. Besides its use in homes, the new coating is finding widespread use in industrial plants, institutions, schools and on farms, according to Mr. Loeser. The coating withstands heat up to 500 degrees Fahrenheit and is especially useful for applying to pipes, boilers, radiators and exposed metal surfaces, he said.

Albert A. Van Pelt, 48, of Mokena, who was found in his home about 8 o'clock Saturday evening suffering from a bullet wound, died in Silver Cross hospital Sunday morning. A neighbor, Robert Heet, who lives west of the Van Pelt home situated on Wolf Road, found the injured man. He told the investigating officers, Deputies Charles Cracraft and John Shelley, that he went to Van Pelt's home to visit him and found him lying on a bed. He thought he was asleep and when he attempted to awaken him saw that there was blood on the pillow under his head.

Heet hurried into Mokena and located LaVerne Braun, a special deputy. Dr. W. H. Cave, of Frankfort was called, and ordered the wounded man removed to the hospital. He was taken there in a West End ambulance from Chicago Heights.

VFW To Back Blood Donor Progr'm

The William Martin Post 725 of Mokena, will cooperate wholeheartedly in the Veterans of Foreign Wars' program of donating blood to Red Cross and local hospital blood banks, Commander Glenn Peterson stated today.

"In view of the terrific sacrifices now being made by our young soldiers in Korea, I think the least we veterans and civilians here at home can do is donate a pint of blood for use either by the armed services or in the civilian defense program," Commander Peterson said.

"Recently the Red Cross has been called upon to double the supply of blood going to the Armed Forces, and with the increasing need of a stockpile of blood plasma to support our civilian defense program, the veterans of William Martin Post feel that our duty becomes very clear."

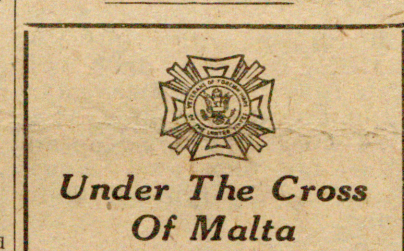

Commander Peterson said that a great many VFW Posts, including Post 725, have had active blood donation programs for several years, but for the duration of the emergency at least, an active donation program is being sponsored by the VFW on a national scale.

PLEASE MAIL THOSE DIMES THIS WEEK

'March of Dimes' contribution cards were mailed to 581 local and rural box holders of Mokena and vicinity recently and as of last Saturday only 48 of these cards had been returned.

The final report on the 'March of Dimes' campaign must be in the county office in Joliet by Saturday, February 17th, so please return these cards promptly in order that the report may be made.

Don't let it be said that the Mokena Community is not interested in aiding the victims of polio.

Last October the VFW released information about a community service contest. Prizes well worth working for are to be awarded to the posts participating and judged worthy.

Community service has always been one of the aims of the VFW, and a part of the obligation each member takes upon joining the organization.

Wm. Martin Post No. 725 has needed money to retire their indebtedness and complete their building. What better way is there to raise some of this money than to win some of the cash the National organization is awarding?

The community has need for the service we can render, and each of us will feel a pride in the community for the part we have played.

The point is that we have stilled and now the time is getting short. Action on any of a number of things we can do, must be started if we are to get any recognition or any part of the awards. Let's get rolling.

Plans have been started for a St. Patrick's Day dance on Saturday March 17. Banas Bros. orchestra has been engaged. Need more be said?

The next meeting of Wm. Martin Post No. 725 VFW will be Thursday, February 22. This will be an open meeting, so each of the members can bring a guest, or anyone interested in any way may come.—Eino L. Saarela, publicity.

Sec. Oster's Report of School Survey Committee Given at New Lenox Feb. 2

Following is the report of the committee appointed to study the non-high school district problem of New Lenox, Frankfort, and Manhattan townships, as given by John Oster, secretary, at the New Lenox meeting February 2.

In July, 1949, the legislature of the State of Illinois enacted House Bill 1070 into law. This statute provides that as of July 1, 1953, all non-high school territory in the State of Illinois shall be abolished. Since all of New Lenox township, all of Frankfort township, and a major portion of Manhattan township were and still are parts of the Will County Non-High School district, it became necessary that the residents of the area should take steps to provide for the high school needs of their students after the expiration of the non-high territory.

Inasmuch as it was understood that in the eventuality that this non-high territory were not incorporated into the bounds of an existing or newly-created high school district upon the date of abolition

of the non-high territory, the present elementary districts would have to bear the responsibility of paying tuition and transportation for the high school students resident within the district, and since it was obvious that few, if any, such districts could support such added responsibility it became necessary that steps be taken to find a solution to the problem. Accordingly, a meeting of the members of the Boards of Education, and Boards of Directors was called in each township to formulate a program of action.

Each school district was asked to choose from its membership or from its constituency, representatives to study the question. For example, in New Lenox township, each of the ten districts outside of the village of New Lenox chose one representative and the district 122 chose 5, only two of whom were members of the Board of Education. In a meeting held in the New Lenox school five delegates were chosen as a committee, were given instructions to study various so-

lutions of the high school problem, and instructed to report back to the entire body their recommendation on the matter. This committee consisted of Laurence Kohl of Mokena; Albert Krusemark, Jr. of Frankfort; George Bovee of Manhattan; James A. Dixon of Lincoln Estates; and John Oster of New Lenox.

Before attempting any solution to the problem the committee came to agreement on certain fundamentals. It was agreed that whatever proposal would be made, it should be made in accordance with these principles.

1. Any proposal must be for the best interests of all the high school students whether they live on farm or in village, whether they plan on attending college, or do not so plan, or whether they come from well-to-do homes or from those not so well off financially.

2. It should keep the control of the school as close to the people who support it as possible.

3. It should recognize that there existed a similarity of interests in all sections. The interests of no one section should be dominant over those of any other. In other words the interest of any part of the area would have to be subordinated to the general needs. There must be a certain give-and-take.

4. That a sufficient property valuation should exist to carry on a sound educational program. The committee was interested in economical schools, but not in cheap schools. An economical school is one that has efficient administration, a good staff of teachers, a well-rounded curriculum, adequate building and grounds, satisfactory transportation, and a reasonable tax rate.

This committee then considered three possible solutions to the problem (1) to attach the various parts of the area to adjacent existing districts, (2) formation of a community unit, (3) formation of a community high school district.

One possible solution, that of attaching parts of the area to various existing school districts, had to be discarded after the election in New Lenox Township held in September. This election, called by petition of fifty or more voters, would have detached New Lenox Township from the non-high school area and added New Lenox to the Joliet Township High School District. As a consequence of the defeat of the proposal no part of New Lenox Township can consider attachment to the Joliet district for two years from the date of the election. We quote from an opinion by Mr. N. E. Hutson, legal advisor in the Department of Public Instruction, State of Illinois. "In reply I refer you to Section 11-18 of the School Code which provides that:

No territory involved in any petition for the detachment thereof from a non-high school district and to add the same to a community, township, or consolidated high school district shall be involved in any such petition to annex the territory to the same high school district oftener than once every two years."

"As I interpret this provision of law, none of the territory in the previous petition may again be involved in such a petition until two years have elapsed. The fact that only a portion of the original territory now desires to annex to Joliet would make no difference. I believe the wording of the above law prohibits the original territory or any part thereof from again petitioning to annex to the same high school district for a period of two years."

To wait two more years to determine the high school status of the area would be ill-advised.

The committee is in accord in the belief that an excellent solution of the total educational problems of the entire area would be the creation of a community unit. However, it is recalled that a very short time ago, the proposal of the Will County Survey Committee to form such district was quite decisively defeated in the rural areas and lacking any evidence of a change of feeling in that sector it was believed ill-advised to call another election on that issue at this time.

Accordingly, your committee recommends that Frankfort Township, that part of Manhattan Township which is in non-high territory, and all of New Lenox Township except school district 212, commonly designated as the Cherry Hill District be incorporated into a community high school district. The Cherry Hill district, it is felt, has closer social interests to Joliet than it has to the rest of this area and therefore should be a part of the Joliet school system. If by informal poll the people of that area should feel that they prefer attachment to the proposed Man-Fra-Len high school rather than the Joliet Community Unit which seems to be evolving they could always make petition to unite with this area.

The committee also would recommend that if the Orland Park High School District should see fit to take steps to consolidate with the Man-Fra-Len area, is largely rural and appears to have the same interests, Orland has good roads, and enough tax valuation to carry its share of the load.

It is outside the province of the committee to select a school site. It will be a responsibility of the elected Board of Education to name sites for the public to vote upon. It is our hope that when a site is selected it will be centrally located as to population and transportation possibilities.

Any attempt on our part to forecast school costs in times like the present are futile. Several months ago, Mr. James Cherry,

assistant superintendent of Joliet Township High School and Joliet Junior College, made as close an estimate as any which could probably be made. His conclusion that for a high school of 500 students, which we would have in a few years, we would expect a minimum rate of \$8-91c is quite likely correct. Our committee rather believes that a rate of \$1.00 would probably be closer to the actual cost. Spreading the tax over a larger area by including Orland Park would probably lower this figure slightly. In any event the cost of the high school would be more than double your present 40c non-high rate.

Below we give the questions that were asked following the meeting in the New Lenox school February 2 and their answers.

Q. If community high school district was voted on, would it bring all children to one spot?

A. No, it would provide a conventional high school, grades 9 to 12.

Q. In normal times it would take about 5 years to put such a program over; what happens if we aren't ready by 1953?

A. We would have to continue present arrangements. Dr. Reavis further said the government will probably not put any barriers in our way.

Q. Even though we cannot consider attachment to Joliet because of New Lenox vote, we are going to discuss advantages and disadvantages of small vs. large school. What are your comments?

A. (Dr. Reavis) My own opinion based on facts and knowledge, is that school is not good because it is large or poor because it is small or vice versa. Quality of services it renders make a school good or bad. Your prospective school might be 1,000 pupils in the early '60's, or at least in excess of 600 pupils. JTHS will solve its problems, not by building another high school, but by building junior high schools around its territory. (Dr. Reavis favors community unit district wherever it can be established, but it takes a lot of education before it is established.)

Q. Will we be safe from neighbors on our flanks who might want us to join in with them in building community high school?

A. Reavis: We have nothing to fear as it is the people of the community who vote and decide all issues. Consolidation couldn't take place without majority of each community wanting it.

Q. Can we build something to take care of our needs for one million dollars, or 5%?

A. Reavis: You won't have to go to 5%, probably around 3% of assessed valuation if Orland Park was in. 3 1/2% if Orland Park is left out could build a school for 350 pupils of a type that could be expanded.

Q. Is any federal or state aid available to us?

A. No; only small appropriations for surveys leading up to plans or to pay architect's fee for original drawings (would have to be paid back later.)

Q. How are we going to get rural areas to vote for increased taxes for community high school?

A. (Oster): We have no real choice, can only vote to establish community high school district. It is now up to you people to explain this to the people in your communities. (Dr. Reavis) Most of community high school petitions have passed; also ours is one of largest groups he has ever seen assembled to discuss preliminary plans.

Q. What about providing 7th and 8th grade education to children from little one room district schools carried out in new high school?

A. It is legally possible.

Q. Will system of tabulating votes from this election be different from tabulation in previous election which defeated community unit system?

A. Total vote of whole area, majority carries. Areas will not be segregated.

Q. If community high school plan were defeated, how long would we have to wait to vote again?

A. As soon as you wish the next month if wanted.

Q. Is there possibility General Assembly will extend the bill beyond 1953?

A. Can't tell, doesn't think so.

Q. What about Orland Park inclusion? Would their tax rate increase or decrease?

A. You can't bring them into the picture until you have voted on a community high school; then you vote on consolidation with them

and it would have to carry in both districts.

Q. How soon can we vote on this proposition?

A. Mr. Oster reads from letter from Mr. Hudson, State Dept. of Education, seems to be about four months. Dr. Reavis says can do it in two months.

with MOLINE-MONITOR FLUTED FEED DRILLS

... with single or double disc openers

Progressive farmers in this area rely on Moline-Monitor drills with fluted feed and double disc or single disc openers to sow crops accurately, at uniform depth with uniform covering and careful banding.

The deep-cut fluted feeds prevent bridging and grinding of seed. Even trashy seed flows through evenly. An exclusive MM feature permits the operator to actually see the seed being delivered to the spouts. No special gates of any kind are needed on the quality MM Monitor Drills. The regular feeds with two speed drive handle everything from soybeans to flax.

Grain growers also prefer Moline-Monitor Drills because of their dependability and long-life, trouble-free operation. Typical of the better construction are the axle bearings which are extra large and completely enclosed in a self-aligning dustproof housing.
